

SULEKHA MISHRA

Java Full Stack Developer

Bengaluru, India | +91 9861796317 | msulekha277@gmail.com

LinkedIn: <https://linkedin.com/in/sulekha-mishra>

PROFESSIONAL SUMMARY

Java Full Stack Developer with 1.5+ years of experience developing enterprise healthcare applications using Java 8, Spring Boot, Hibernate, React.js, REST APIs, Microservices, Oracle, and PostgreSQL. Skilled in backend development, frontend integration, SQL optimization, production support, CI/CD, Agile Scrum, and SDLC. Passionate about building scalable, high-performance applications and delivering business value through clean, maintainable code.

CORE COMPETENCIES

Java Development • Spring Boot • Hibernate • React.js • REST APIs • Microservices • Oracle • PostgreSQL • SQL Optimization • Backend development • CI/CD • Jenkins • Git • Agile Scrum • JUnit

TECHNICAL SKILLS

- **Programming:** Java 8, J2EE, SQL, JavaScript
- **Backend:** Spring Boot, Spring MVC, Hibernate, JDBC, JSP, RESTful APIs, Microservices
- **Frontend:** React.js, HTML5, CSS3, JavaScript
- **Databases:** Oracle, PostgreSQL, MySQL
- **Tools:** Git, Maven, JIRA, WebSphere
- **Testing:** JUnit, Unit Testing, UAT
- **Methodologies:** Agile Scrum, SDLC, SOLID Principles, Design Patterns

PROFESSIONAL EXPERIENCE

Software Engineer | Infinite Computer Solutions | Bengaluru

Aug 2025 – Present

- Developed enterprise healthcare applications using Java 8, Spring Boot, Hibernate, JSP, and React.js.
- Designed and implemented RESTful APIs and Microservices for scalable backend systems.
- Integrated React.js frontend with backend services for seamless user experience.
- Optimized Oracle and PostgreSQL queries to improve application performance.
- Resolved production issues through root cause analysis and defect fixes.
- Worked with Git, Maven, Jenkins, JUnit, CI/CD pipelines, and Agile Scrum.

Java Full Stack Developer Intern

Mar 2025 – Aug 2025

- Completed 6 months Java Full Stack internship covering Spring Boot, Hibernate, React.js, SQL, and Agile Methodologies as part of **Infinite Computer Solutions**
- Developed and deployed backend components using Spring Boot and resolved application issues within an enterprise Agile environment using JIRA.
- Received a full-time Software Engineer offer based on performance.

PROJECTS

CMDS Interface Development

Technologies: Java 8, Spring Boot, Microservices, PostgreSQL, React.js

- Architected and implemented scalable REST APIs and backend microservices for CMDS interface processing, achieving 98% improvement in operational efficiency.
- Optimized PostgreSQL queries and indexing strategies, reducing query execution time by 35% under high-load production conditions.
- Developed a responsive React.js frontend integrated with Spring Boot APIs to support real-time CMDS operations.

Alaska MMIS TSU Portal

Technologies: Core Java, JSP, Hibernate, JDBC, XML, HTML, CSS, JavaScript, Oracle

- Resolved 15+ critical TSU defects in the Alaska Medicaid Management Information System (MMIS) , ensuring regulatory compliance and timely delivery.
- Reduced UAT portal failure rate by identifying and fixing recurring issues across multiple sprint cycles.
- Prepared technical documentation and JUnit unit test cases; led triage calls to resolve project blockers and improve delivery efficiency.
- Supported maintenance and enhancements for HIPAA-compliant healthcare claims processing workflow in a regulated enterprise environment.

EDUCATION

Bachelor of Engineering (Computer Science Engineering)
GITA Autonomous College | 2021 – 2025

LANGUAGES

English, Hindi, Odia, Japanese (Basic)
